Cologne (D) and Schaan (FL) – 9 March 2015

Polishing and crystallization of crowns

IPS e.max CAD self-glaze offers alternative and efficient processing

IPS e.max CAD is the clinically proven lithium disilicate glass-ceramic ideally suitable for manufacturing monolithic restorations featuring a new, alternative and efficient processing technique. The restorations are polished with silicone and diamond polishing systems (e.g. OpraFine) and then crystallized. Glazing becomes unnecessary.

IPS e.max® is a registered trademark of Ivoclar Vivadent AG.
