IvoSmile

WHERE BEAUTIFUL SMILES BEGIN

IvoSmile¹ is an innovative dental software application (app).

IvoSmile uses augmented reality to visualize the possibilities for esthetic treatment options directly on the patient. Your iPad² turns into a virtual mirror.

Get your patients interested in planning a dental smile makeover, ideally together with your dental technician: Use virtual visualizations to show your patients the possibilities for enhancing their smiles effectively and quickly.

Your patients can see what they would look like with the prospective esthetic restoration in place. They will find it easier to decide whether they want to commit their time and money to the process of detailed cosmetic treatment planning.

IvoSmile includes a Bleaching option to simulate bleached natural teeth. You can therefore also use the app to advise your patients on the ideal degree of whiteness.

Test IvoSmile for 30 days free of charge and discover its benefits!

For more information about the app and how to download it, please visit:

YOUR BENEFITS

Awake emotions

- Show your patients the possibilities for enhancing their smile quickly and effectively in a few short minutes.

Explain and show the easy way

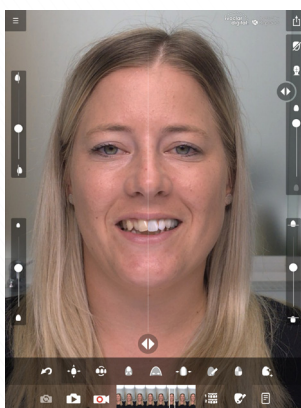

- Use visualizations to explain your patients complex issues in an easy-to-understand manner.
- Visualize the effects of a prospective tooth whitening procedure on the natural dentition.
- Explain potential limitations (due to the patient's anatomy) impacting on the realization of an esthetic treatment in words that patients understand.

Enhance your professional communication

- Share pictures and projects and facilitate the collaboration between you and your dental lab partner.

Silhouette mode to align the virtual with the natural situation

Preview of the new situation with the slider

Individual adaptation of the incisal contours

The IvoSmile app can be downloaded from Apple App Store;
a 30-day free and fully featured trial period is included in the download.

Technical requirements: Apple iPad² with 64-bit CPU and iOS 10 or higher

¹ IvoSmile is currently only available in the following countries: Austria, Bosnia-Herzegovina, Brazil, China, Croatia, Finland, Liechtenstein, Montenegro, Romania, Switzerland, Serbia, Slovenia, and the US. It will be launched in additional countries starting with April 2019.
