### 6.1 **Personal precautions, protective equipment and emergency procedures:**-Wear protective equipment. Keep unprotected persons away.

Use of suitable equipment (incl PPE) to prevent contamination of skin, eyes, clothing, removal of ignition sources, ventilation, emergency procedures (eg. evacuate, consult expert).

### 6.2 Environmental precautions:-

Do not allow to enter sewers/surface or ground water.

**6.3** Methods and materials for containment and cleaning up:-Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.

### 7. HANDLING AND STORAGE

### 7.1 Precautions for safe handling:-

No special measures necessary if stored and handled as prescribed.
Only adequately trained personnel should handle this product.
Ensure good ventilation/exhaustion at the workplace.
Prevent formation of aerosols.
Keep ignition sources away – do not smoke.
Protect against electrostatic charges.
Wash hands before breaks and after work.
Do not eat, drink or smoke during work time.
Remove soiled or soaked clothing immediately.
Keep away from foodstuffs and beverages.
Conditions for safe storage, including any incompatibilities:-

 7.2 Conditions for safe storage, including any incompatibilities:-Keep only in the original container. Containers which are opened must be carefully closed and kept upright to prevent leakage. Keep container tightly sealed. Store in cool, dry conditions in well-sealed receptacles. Store receptacle in a well ventilated area. Recommended storage temperature for storage rooms and vessels is 20 - 30°C.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1 Exposure control measures:-

Occupational exposure limits:

| Component | CAS No. | Value                                   | Parameters | Basis                                                          |  |
|-----------|---------|-----------------------------------------|------------|----------------------------------------------------------------|--|
| Ethanol   | 64-17-5 | Long-term value: 1920 mg/m <sup>3</sup> | 1000 ppm   | The lists valid<br>during the making<br>were used as<br>basis. |  |

### Ingredients with biological limit values:-

Exposure should be kept to as low as practicable and below the AOES.

### 8.2 Biological monitoring:-

Assess in accordance with exposure limits – please refer to section 8.1.

Exposure controls / Personal protective equipment / General protective and hygienic measures:

Usual hygienic measures for dental practice.

Wash hands before breaks and at the end of work.

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing.

### 8.3 Control banding:-

Use good industrial hygiene practice and general ventilation.

### 8.4 Engineering controls:-

In case of intensive contact, wear protective gloves (EN 374).

Before use, the protective gloves should be tested in any case for its specific work-station suitability (i.e. mechanical resistance, product compatibility and antistatic properties).

Adhere to the manufacturer's instructions and information relating to the use, storage, care and replacement of protective gloves.

Protective gloves shall be replaced immediately when physically damaged or worn.

| 8.5 | Individual protection measures include PPI | =:- |
|-----|--------------------------------------------|-----|
|     | Eye/face protection:                       | Sa  |

Skin protection:

### afety glasses

Use tightly fitting safety glasses as per Australian Standard AS 1336 and AS/NZS 1337.

**Protective gloves** The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Material of gloves Butvl rubber. BR. Fluorocarbon rubber (Viton). PVA gloves. The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Provide for good ventilation of working area (local exhaust **Respiratory protection:** ventilation. if necessary). In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

### 9. PHYSICAL/CHEMICAL PROPERTIES

9.1 Information on physical/chemical properties:-

| a) | Appearance/Form:                      | Fluid.                                                    |                 |  |
|----|---------------------------------------|-----------------------------------------------------------|-----------------|--|
| b) | Colour:                               | Colourless.                                               |                 |  |
| C) | Odour:                                | Like peppermint.                                          |                 |  |
| d) | Odour threshold:                      | Not determined.                                           |                 |  |

- 11.5 Exposure levels and health effects:-
- 11.6 Interactive effects:-
- 11.7 Other:-

No further relevant information available. No further relevant information available. No further relevant information available.

- 12. ECOLOGICAL INFORMATION
- 12.1 Ecotoxicity:-
  - No further relevant information available.
- **12.2 Persistence/degradability:-**No further relevant information available.
- **12.3 Bioaccumulative potential:-**No further relevant information available.

# 12.4 Mobility in soil:-

No further relevant information available.

# 12.5 Other adverse effects:-

# No further relevant information available.

Additional ecological information / General notes: Do not allow undiluted product or large quantities if it to reach ground water, water course or sewage system.

### 12.6 Other adverse effects:-

No further relevant information available.

### 13. DISPOSAL CONSIDERATIONS

### 13.1 Disposal methods:-

Must not be disposed together with household garbage.

Do not allow product to reach sewage system.

Residuals must be removed from packaging and when emptied completely disposed of in accordance with the regulations for waste removal.

Incompletely emptied packaging must be disposed of in the form of disposal specified by the regional disposer.

Disposal must be made according to official regulations.

Take to an approved landfill or a waste incineration plant, under conditions approved by the local authority.

### 15. REGULATORY INFORMATION

**15.1** Safety, health and environmental regulations/legislation specific for the substance/mixture/product:-Classified as Hazardous according to the criteria of the National Occupational Health and Safety Commission (NOHSC) approved criteria for the classifying hazardous substances [NOHSC: 1008] 3rd edition.

Standard for the Uniform Scheduling of Medicines and Poisons. Carcinogen classification under WHS Regulation 2011, Schedule 10. Notification status in accordance with section 3 and current national legislation.

### 16. OTHER INFORMATION

Key to abbreviations/acronyms used in SDS:-

H225 Highly flammable liquid and vapour. H301 Toxic if swallowed. H311 Toxic in contact with skin. H331 Toxic if inhaled.

### Key literature references/data sources used to compile SDS:-

Standard EN420:2003 General requirements for protective gloves: disposable gloves, e.g. nitrile rubber, material thickness 0.1 mm (Australian Standard 2161).

Long-term exposure (Level 6: < 480 min): protective gloves, e.g. nitrile rubber, material thickness 0.7 mm (Australian Standard 2161).

Personal eye protection - Eye and face protectors for occupational applications: safety glasses (Australian Standard AS 1336 and AS/NZS 1337.1:2010).

### Abbreviations and acronyms:-

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road).

IMDG: International Maritime Code for Dangerous Goods.

IATA: International Air Transport Association.

GHS: Globally Harmonised System of Classification and Labelling of Chemicals.

EINECS: European Inventory of Existing Commercial Chemical Substances.

ELINCS: European List of Notified Chemical Substances.

CAS: Chemical Abstracts Service (division of the American Chemical Society).

LC50: Lethal concentration, 50 percent.

LD50: Lethal dose, 50 percent.

Flam. Liq. 2: Flammable liquids, Hazard Category 2.

Flam. Liq. 3: Flammable liquids, Hazard Category 3.

Acute Tox. 4: Acute toxicity, Hazard Category 4.

Skin Irrit. 2: Skin corrosion/irritation, Hazard Category 2.

Eye Irrit. 2: Serious eye damage/eye irritation, Hazard Category 2.

Repr. 2: Reproductive toxicity, Hazard Category 2.

STOT SE 3: Specific target organ toxicity - Single exposure, Hazard Category 3.

STOT RE 2: Specific target organ toxicity - Repeated exposure, Hazard Category 2.

Asp. Tox. 1: Aspiration hazard, Hazard Category 1.
