

# Programat<sup>®</sup> App

Total control at your fingertips with the Programat<sup>®</sup> App

# Programat® App

Keeps you informed of what your furnace is doing

The Programat® App offers users of the newest Programat generation the possibility to communicate with their furnaces through a WLAN connection. The following functions make the operation of the Programat press and ceramic furnaces even more comfortable:

## Status display

With the status display, you can follow up on the progress of the current firing program. By turning the smartphone, a coloured firing curve (corresponds with the display for the P510) is displayed.

## Diagnosis

With this diagnosis function, you can read the Programat diagnostic data and thus see all the information regarding your Programat furnace at one glance.

## Messenger

The messenger function sends notifications about the currently running program to you and lets you know when the program is completed. You receive these notifications even when the app is closed.

Download the app from the App Store to your Smart Phone free of charge. You will be impressed by its easy operation. Compatible with Programat P310/P510, starting with software version V2.1, and with Programat EP 3010/EP 5010, starting with version V1.1

The following systems are supported:

iOS\*, Android\*, Windows 8 Mobile\* (Android\* and Windows 8 Mobile\* available end of 2014)
