IPS Empress[®] CAD

High-tech precision makes your smile look so beautiful

IPS Empress[®] CAD

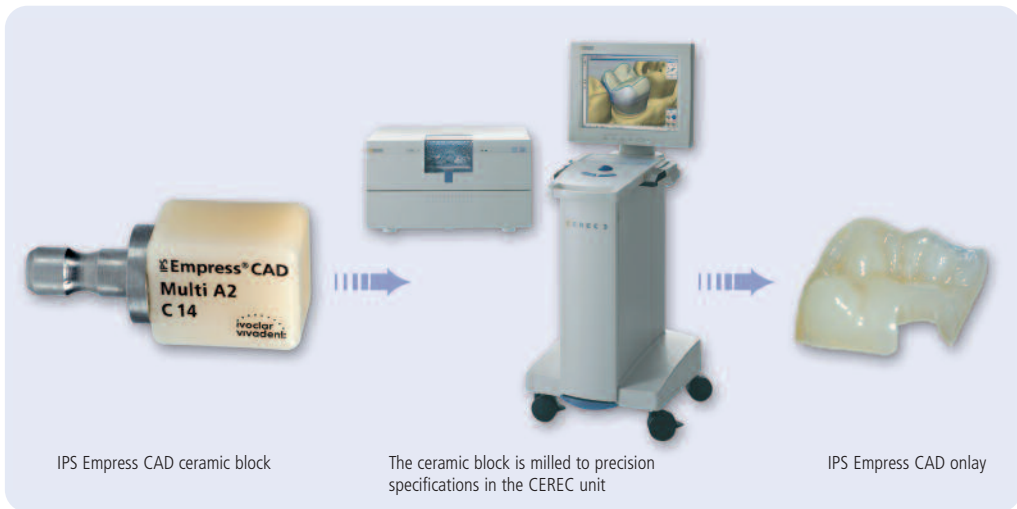

CERAMIC FOR MODERN DENTISTRY

IPS Empress CAD is a high-quality ceramic for fabricating inlays/onlays, veneers and crowns. This material meets the cutting-edge requirements of aesthetics, function and durability. In addition, the material has proven itself a

million times over in the dental office. The IPS Empress CAD all-ceramic is used without a metal substructure and represents a biocompatible alternative – not only for allergic persons.

The leucite-reinforced glass-ceramic blocks are machined using the innovative CAD/CAM technology of the CEREC® unit.

CEREC® is a registered trademark of Sirona Dental Systems GmbH

INLAYS / ONLAYS

Today, there are attractive alternatives to the frequently used amalgam fillings. Only your dentist will recognize a restoration made from IPS Empress CAD.
