IPS d.SIGN®

The fluorapatite-leucite glass-ceramic

IPS d.SIGN

is a high-quality fluorapatite-leucite glass-ceramic.

The material, which has been successfully used in dentistry for many years, is specially designed for fabricating metal-supported crowns and bridges.

All IPS d.SIGN alloys

are coordinated with the IPS d.SIGN ceramic and their biocompatibility is well documented.

The coordinated materials

from one manufacturer ensure a high standard of quality of dental restorations.

Natural tooth structure

IPS d.SIGN ceramic

IPS d.SIGN metal framework

The IPS d.SIGN ceramic is applied to the cast metal substructure.

IPS d.SIGN metal-ceramic bridge from Ivoclar Vivadent, Schaan, Principality of Liechtenstein

The right dental restoration
will heighten your sense of
wellbeing.

Crowns

High-quality IPS d.SIGN crowns will restore even severely damaged teeth. Crowns made of this material successfully blend into the surrounding natural dentition.

Enjoy life to the fullest!

Bridges

Missing teeth can be replaced by a bridge. As the alloys and ceramic materials of this system are finely coordinated, IPS d.SIGN bridges are highly esthetic.
