Multilink® Hybrid Abutment is a self-curing luting composite. It is suitable for the permanent, extraoral cementation of ceramic and PMMA structures on titanium bases in the fabrication of hybrid abutments or hybrid abutment crowns.

This results in:
- a permanent cementation due to high bond strength values
- optimum esthetics due to two available opacity levels
- easy handling due to the convenient Automix syringe

Outstanding bond

In combination with Monobond® Plus universal primer, Multilink Hybrid Abutment is capable of establishing a strong, stable bond between the ceramic structure made of lithium disilicate (LS₂) or zirconium oxide (ZrO₂) and the titanium base.

In combination with the bonding agent SR Connect, Multilink Hybrid Abutment is also suitable for the fabrication of temporary abutment crowns made of PMMA such as Telio® CAD. This results in high flexibility during the treatment and provides optimum esthetics and efficiency.

The pull-out shear bond strength of ceramic structures bonded on titanium bases after 10,000 thermocycles. Different luting composites were used in this comparison.

Delivery forms

IPS e.max Abutment Solutions Cem Kit, 638959AN
Multilink Hybrid Abutment syringe HO 0, 1 x 9 g
Mixing tips, 15 x
Virtual Extra Light Body Fast Set, 1 x 50 ml
Mixing tips, 48 x
Intraoral tips, 100 x
Monobond Plus, 1 x 5 g
Liquid Strip, 1 x 2.5 g
Various accessories
**Monobond® Plus**
The universal primer conditions the TiBase and the ceramic structure (for example made of IPS e.max® CAD/Press) and prepares both for the cementation with Multilink Hybrid Abutment.

**SR Connect**
The bonding agent conditions the temporary restoration made of Telio CAD and prepares it for the cementation with Multilink Hybrid Abutment.

---

**Optimum esthetics**
Thanks to the highly opaque HO 0 shade, Multilink Hybrid Abutment ensures an optimum esthetic outcome even in challenging cases.

Apart from the opacity level HO 0, Multilink Hybrid Abutment is also available in the transparent shade MO 0.

---

**Multilink Hybrid Abutment Refill**
647182AN HO 0
647183AN MO 0
Automix syringe, 1 x 9 g (in the selected shade)
Mixing tips, 15 x

**Multilink Hybrid Abutment Starter Kit, 662810AN**
Multilink Hybrid Abutment syringe HO 0, 1 x 2.5 g
Mixing tips, 4 x
Monobond Plus bottle, 1 x 1 g
Various accessories

**Monobond Plus Refill, 626221AN**
Bottle, 1 x 5 g

**SR Connect Refill, 642236**
Bottle, 1 x 5 ml
Products for the fabrication of Abutment Solutions form part of the “Fixed Prosthetics” category. The products of this category cover the procedure involved in the fabrication of fixed prosthetic restorations – from temporization to restoration care. The products are optimally coordinated with each other and enable successful processing and application.

### IPS e.max® System

**all ceramic – all you need**

- Highly esthetic, high-strength materials for the press and CAD/CAM technique
- Unique lithium disilicate (LS₂) and zirconium oxide (ZrO₂) ceramics for restorations ranging from thin veneers to large-span bridges
- Flexibility of cementation: adhesive, self-adhesive and conventional

### Cervitec®

The protective varnish with chlorhexidine and thymol

- Effective care for restorations
  - Targeted – professional application in risk areas
  - Effective – intensive care for high-quality restorations
  - Efficient – optimum pink-and-white esthetics
