Clean dentures last longer

New: Denture cleaning kit containing Cervitec Gel

Meticulous personal oral hygiene plays an important part in the long-term maintenance of dentures and oral health. Cervitec Gel is designed for cleaning dentures and conditioning the gums and oral mucosa and treating natural teeth. Now this oral care gel is available in a compact denture care kit.

The kit contains a 20-g tube of Cervitec Gel for cleaning dentures in addition to a convenient denture storage container. A package insert provides practical information on how to use the container and the gel. Dental practices can order the corresponding patient information leaflet about Cervitec Gel entitled “Oral health for denture wearers” including a handy stand-up display free of charge. Orders can be placed by e-mail at info@ivoclarvivadent.com.

Cervitec® is a registered trademark of Ivoclar Vivadent AG.
