PERFECT HARMONY.

IPS Style®
for metal-ceramic restorations

IPS e.max® Ceram
for all-ceramic restorations
IPS Style®
The first patented metal-ceramic containing oxyapatite

New crystal structure:
The handling and optical properties are unique.

Needle-shaped oxyapatite
4 reasons, why IPS e.max® and IPS Style® are so well suited

- Coordinated shade scheme
- Intuitive modelling properties
- Identical gingiva design
- Identical stains and glazes
A combination of IPS Style and IPS e.max creates an overall harmonious appearance in the patient’s mouth.
IPS e.max Ceram and IPS Style layering materials remain stable during application and have good firing characteristics.
Identical shades and product designations with IPS e.max and IPS Style for a lifelike creation of the prosthetic gingiva (Gingiva Solution).
4

Identical stains and glazes

IPS Ivocolor can be used for the individualization of all* layering, press and CAD ceramics from Ivoclar Vivadent.

*with the exception of non-crystallized IPS e.max CAD and CAD-on restorations
