

PrograMill PM7

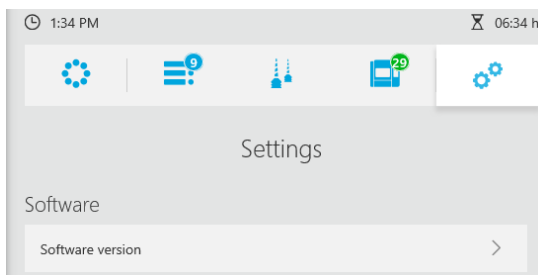

PrograMill PM7 Software Update V84.78

How to install the new software version:

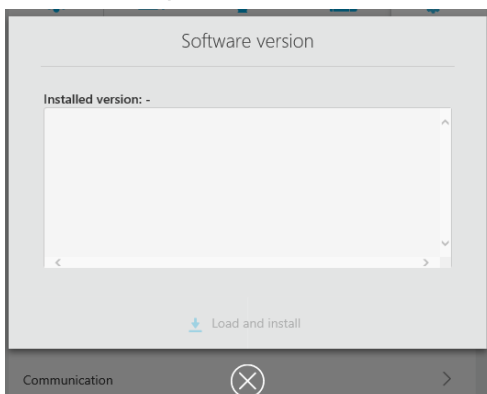

1. Save the current software version on an empty USB stick from the download area of the corporate website. Link: <http://www.ivoclarvivadent.com/cad-cam-download-center/>

2. Make sure that all active milling jobs are finished.
3. Connect the USB stick with the current software version with the PrograMill PM7.
4. Select «Software version» in the settings menu.

5. Select the update and tab «Load and install»

6. After a successful installation, the machine restarts.
