Helioseal® F Plus

The efficient fissure sealant

Protection for pits and fissures
Helioseal® F Plus  
Protection for pits and fissures

Precise dispensing
Helioseal® F Plus is a light-curing, white-pigmented, fluoride-releasing fissure sealant. It comes in a syringe, which allows the product to be precisely dispersed and applied. With the fine tip the sealant is applied quickly and accurately without overfilling the fissure.

Excellent flow properties
Helioseal F Plus is flowable and it is easy to distribute on intricate surfaces – even in the upper jaw. The tight marginal seal provides protection against cariogenic germs. Fine filler particles ensure a smoothly sealed surface.

Fast curing
With the help of an appropriate curing light, such as Bluephase Style or Bluephase G4, Helioseal F Plus can be cured in only ten seconds. Due to its short light-curing time, precise application and excellent flow and wetting properties, the sealant offers fast and efficient treatment in children and adolescents.

Helioseal® F Plus – The efficient fissure sealant

Advantages
- New formulation featuring optimized consistency
- Precise dispensing and application
- Reduced exposure time

Benefits
- Optimum distribution on the intricate surfaces of pits and fissures
- Efficient treatment
- Fast, comfortable treatment for children

Helioseal® F Plus deliver forms

- Helioseal F Plus  
  Syringe containing 1.25 g

- Helioseal F Plus  
  Cavifil containing 0.1 g
